

Pledging our support for Love Windermere and the stewardship of the natural places in the Lake District

We support Love Windermere because we share their vision to lead in the environmental stewardship of Windermere and the improvement of its water quality. We believe that their model of collaboration is key and can be an exemplar for the protection of our natural places in the wider Lake District. Love Windermere's research led action plan demonstrates commitment to the steps that take water quality in Windermere from excellent to outstanding and is progressive in looking to protect our natural environment for future generations.

Thwaites are proud to support this vision and put our name to the great work being done by Love Windermere.

Rick Bailey
Chairman, Thwaites

In support of the goals Love Windermere are pursuing, Thwaites are taking the following actions:

- Promoting the work of Love Windermere and sharing progress
- Sharing good news stories about Windermere and the Lake District with our customers
- Investment in the safe management of water discharge
- Investment in rainwater harvesting
- Working with the Environment Agency to report concerns over water quality
